

CigaretteBuster™

Internal Alarm for Local Enforcement

The advantages are clear!

The most popular non-smoking enforcement system in the world

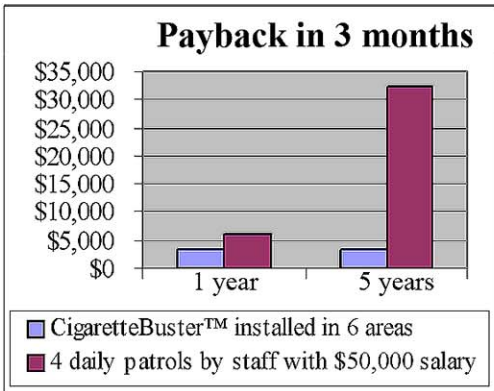

It's Successful!

Continuous and automatic monitoring eliminates smoking in bathrooms, stairwells, and other areas designated as non-smoking

It's Cost-Effective!

Pays for itself in a few months by freeing staff from routine bathroom patrol

It's Impartial!

Decreases complaints about non-smoking rules violations

It's Simple!

Easy to install and low maintenance

Praise for CigaretteBuster™

High school teacher Dick Austin observed immediate elimination of both smoking and the need for teachers to act as monitors and said "I can't praise it enough"

How the CigaretteBuster™ Internal Alarm models works:

Install Detector in room to be monitored. Detector senses when any illicit smoking occurs and sounds an internal alarm. Detectors are available in 6 styles typically found in restrooms as shown to the right.

Proven results in high schools, colleges, hotels, airports, factories, and hospitals for over 10 years.

We also carry short range wireless systems, wired systems, and systems with pager notification. Call us to help you determine which approach best suits your site.
Stop non-smoking policy abuse
