RE: Stealth Enforcement System

Dear Mr. Kauffman,

Spring of 2006 we ordered the Stealth Enforcement Systems for two of our 4 high schools. This letter is to tell you how pleased we are with them.

After we received the systems, we discovered that the sprinkler-head type of detectors would not work because of the wrong type of ceilings for them. You graciously allowed us to return the systems and you switched the sprinkler-head detectors with the surface mounted ones, without cost to us. Thank you.

We finally got the systems installed over the 2006 Christmas break. Since the student's return, the staff has been kept running answering the alarms. The message has been received by the students, "you smoke here, you will get caught."

Two things have happened. Clearing the air for all and adding physical exercise for staff--Not a bad combination for improving the overall health of those in the high schools of our county! Our third high school, who turned down our initial offer to purchase the system for them, now wants the system. The Principals of the schools with the systems are singing accolades about the Stealth Enforcement System, so, I expect the fourth one to follow shortly.

Respectfully,

Cynthia G. Brown, BS, CHES, LPN
Health Education Coordinator
