

# Riverside High School

February 8, 2010

To Whom It May Concern:

Riverside High School has been very pleased with the Stealth detectors. We have seen a dramatic decrease in the number of students smoking in our restrooms.

The unique and easy to use "beeper" system allows our administration to handle students smoking in the restrooms during class, between classes, and even at after school events. This product along with our Health Clinic services is truly helping students to stop smoking.

I would recommend this product to any school or organization that is faced with trying to ban smoking inside a public building.

Sincerely,

Paula Potter, Ed.D.  
Principal
