Dear Mike,

I just can't believe how effective your cigarette detectors have been for us.

The high school principal has reported to our Board and repeatedly has told me that the reduction of smoking in the restrooms had been well over 90%!

Even the students have noticed and shown their appreciation and support by attending our Board meetings and publicly citing the success of the units and the school's program to reduce their exposure to cigarette smoke.

Thank you for a great product and for providing the service to back it up.

Regards,

Bill Ankney
